

G10

- Four programmable volumetric dosage's for each Group
- Automatic boiler refilling
- Automatic back flush program on each group
- Built-in volumetric motor and pump fitted with 2 retention valves and solid particle filter
- In built magnetic calcium neutraliser on pump and heat exchangers
- Direct pre-infusion chamber on each group
- Optional in built electronic pre-infusion on each group
- 99.9% pure copper boiler with in built thermosyphon
- Freshwater heat exchange boilers on each group
- Polished stainless steel body panels
- Stainless steel steam tubes

Features

- Digital display
- Digital control of boiler temperature through display
- Maximum stable control of temperatures using PID technology
- Memorises total brewed coffees
- Programmable time clock for automatic switching on/off
- Warning display in case of lack of water in boiler with element protection
- Maintenance management with programmable service reminders

Supplied with installation kit

- Water filter assembly
- Stainless steel braided hose
- Flexible waste hose

Models Available

- 1, 2 and 3 Groups
- High Group

Made in the 

European Design, European Experience
